Summary

Fullstack Software Engineer, focused on developing scalable and performant systems. I enjoy working collaboratively but can also run with projects independently. Excited about both mentorship and learning from people with different backgrounds.

Experienced and currently interested in technologies like React, React Native, NodeJs, Apollo GraphQL, PHP (Laravel), Elasticsearch, MySQL, PostgreSQL, and Cloud computing platforms (AWS, GCP)

Professional Experience

Professional Sabbatical

November, 2025 - Present

- Career transition focused on personal and professional development and freelance web development. Built websites for a small business while expanding expertise in Astro, Laravel, GSAP, AWS, software architecture, and system design through hands-on projects and continuous learning, and leveraged tools including Claude and Gemini to accelerate development while maintaining engineering quality through human review.

Fullstack Software Engineer at Salesloft

April, 2020 - November, 2025

- Delivered production-grade full-stack software for high-scale SaaS products using React, Node.js, TypeScript, GraphQL, Kubernetes, PostgreSQL, Elasticsearch, and GCP. Partnered with cross-functional engineering teams to design, implement, deploy, and maintain reliable production systems.
- Served as Technical Lead for the Salesloft Mobile application, using React Native, Zustand and Typescript.

Fullstack Software Engineer at Tiempo Development

August, 2017 - April, 2020

- Worked on a project for an international E-Learning platform using React, Redux, GraphQL, and a backend supported by NodeJS and Express, as well as technologies such as AWS Lambdas, AWS S3, AWS Dynamo DB and PostgreSQL.

Frontend Developer at EPAM Systems

November, 2016 - August, 2017

- Worked closely with Product Managers to define the strategy and implement the website redesign for the legal branch from a well-known news agency, using React and Redux, and the Foundation CSS Framework.
 - Built internal tools using NodeJS, Express and Puppeteer to automate the QA process for a project based in Angular2.
-

Education and Certifications

Certified SCRUM Master

Scrum Study
2018-2021

Bachelor Degree

Information Technology
UNAM-Mexico
2008-2012
